- **Frameworks:** React, Express, Node.js
- **Databases:** MongoDB, MySQL
- **Tools:** Tailwind CSS, Socket.io, Daisy UI
- **Version Control:** Git, GitHub
- **Other Skills:** SDLC, RESTful APIs, System Design, Debugging

Personal Details

Date of Birth: 12th May 2001

Languages Known: English and Urdu

Address: House No. R-12, White House Garden
Society, Scheme 33, Karachi, Sindh

Summary

- A **Full Stack Developer** with strong problem-solving abilities.
- Proficient in developing responsive web applications using the MERN stack (**MongoDB, Express.js, React.js, Node.js**).
- Hands-on experience building and integrating **APIs** for seamless data handling and efficient functionality.
- Skilled in creating intuitive, user-centric interfaces with a focus on performance and user experience.
- Knowledgeable in **database** management, authentication systems, and deploying applications on cloud platforms.
- Passionate about **problem-solving**, coding challenges, and staying up-to-date with the latest web development trends.
- Eager to contribute to innovative projects, grow in a collaborative environment, and take on new challenges to enhance development skills.

Projects

Real Time Chat Web App

July 2024 – August 2024

Tools: React, Tailwind CSS, Mongo, Daisy UI, Socket.io

Build a Realtime Chat App with MERN Stack.

Responsibilities:

- Developed responsive and dynamic front-end components with React and Tailwind CSS, ensuring optimal user experience across devices.
- Integrated MongoDB for efficient storage and retrieval of chat messages and user data, ensuring data persistence.
- Utilized Daisy UI to enhance the UI/UX, ensuring a modern, accessible, and user-friendly design.
- Developed back-end APIs with Express and Node.js to handle real-time message exchanges and user authentication.
- Deployed and maintained the application, ensuring scalability and smooth performance during peak usage times.
