OBJECTIVE

Full-Stack Engineer (MERN + Prisma + Next.js) with hands-on production experience across auth, REST APIs, and data-heavy UIs. Ship fast, write clean code, own the full stack.

EXPERIENCE

Full Stack Developer Intern Zero Vertical Labs

Feb 2026 – Present

Project: Cathedral / CatyOS – Full-Stack Engineer

- Built and shipped a multi-role assessment platform (React + MUI v6 + Express + Prisma + Neon Postgres + Clerk auth) serving 4 distinct user roles with role-based access control across 30+ REST endpoints.
- Designed and shipped an admin-configurable question-weighting system end-to-end — Prisma schema, idempotent SQL migration, REST API (GET/PUT/finalize), 9-slider admin UI, locked-survey gate, and weighted-aggregation scoring engine.
- Ingested and integrated 5 scored assessments totaling 120+ questions across 30+ categories, including a single-state variant with custom per-question point scoring (0–4 pts).
- Built custom SVG radar visualizations using d3-shape (lineRadial + Catmull-Rom splines) with stable pseudo-random axis jitter, radial gradients, glow filters, and animated stroke-dashoffset draw-in.

Web Developer Intern (Remote)

May 2025 – Oct 2025

Mentoga

[Live Demo](#) | [GitHub Repo](#)

- Built and deployed 5+ production-ready web applications using Next.js and Tailwind CSS on Vercel
- Designed responsive, component-based UIs across 10+ pages with a focus on performance, accessibility, and clean architecture
- Integrated 3rd-party APIs to deliver dynamic content and improve application interactivity across multiple projects
- Collaborated using Git/GitHub workflows, maintaining modular and scalable code structure

SKILLS

Programming Languages: JavaScript, Typescript

Web & Application Development: React.js, Node.js, Express.js, Next.js, HTML5, CSS3, Tailwind CSS, MUI, Prisma, React Query, d3.js

Databases: MongoDB, PostgreSQL

Version Control & Tools: Git, GitHub, Postman

Deployment & Hosting: Vercel, Netlify, Render

PROJECTS (FYP)

Real-time Collaboration & Messaging Platform (Mini-System)

[Live Demo](#) | [GitHub Repo](#)

- Developed a scalable **real-time messaging system** using the MERN stack
- Secured user authentication and authorization with **JSON Web Tokens (JWT)**
- Built a responsive and accessible front-end using **React and Daisy-UI**
- Designed MongoDB schemas to support **efficient real-time message handling**

EDUCATION

Bachelor of Computer Science,

Sindh Institute of Management and Technology

January 2021 - September 2025
